

Modular Thumb Implant

A clinically proven CMC joint implant solution.^{1,2}

The BioPro® Modular Thumb Implant is a clinically proven treatment option for CMC joint arthritis. The Modular Thumb Implant continues to demonstrate improved function, long term survivorship and pain relief.^{1,2}

Modular Thumb Implant

An implant you can trust.

- 94% implant survivorship at 72 months¹
- 99.3% good or excellent cosmetic appearance¹
- Improved pinch and grip strength^{1,2}
- Preserves abductor pollicis longus for stability

Four Stem Sizes. Four Head Diameters. Three Head Offsets.

Utilizing modular components allow the head to be sized to match the anatomy of the trapezium and the stem to be sized to match the metacarpal. Additionally, offset head diameters allow the joint to be properly tensioned.

Standard cobalt chrome, available in titanium for metal sensitivities

Medial offset head minimizes subluxation

Titanium plasma spray stem allows biological fixation

Varus angle alignment prevents dislocation
