

Hand & Wrist

Our unique Hand & Wrist portfolio offers proven joint replacements and fixation devices to address common conditions and procedures.

Modular Thumb Implant

A customizable CMC joint implant designed to preserve anatomy, thumb length and pinch and grip strength. The implant is supported by two decades of combined clinical experience and research with published results of 94% survivorship at 6 years.¹

Clover Staple™

3-leg and 4-leg nitinol memory-alloy staple specifically designed for four corner fusions and other limited wrist fusions. The staples activate at patient body temperature, providing dynamic, centralized compression designed to speed up the fusion process.

Cannulated Compression Screws

A comprehensive line of titanium cannulated screws including headed and headless screws. Go-EZ® headed screws range from 2.0 to 6.5mm while headless designs are available in 2.5 or 3.0mm.

Memory Staple

A 2-leg nitinol memory-alloy staple available in 17 standard sizes. The unique s-bridge staple activates at patient body temperature to provide dynamic compression.
